

What to do if your child was **EXPOSED** to someone with COVID-19

Does your child have COVID-19 symptoms?

YES

NO

Refer to
SYMPTOM
decision tree.

Has your child been diagnosed with
COVID-19 (positive test or diagnosed by a
medical professional) in the past THREE
months?

YES

NO

Child may remain
in school
AND
Monitor for symptoms.
Testing is not required.
If symptoms develop,
refer to SYMPTOM
decision tree.

Child must quarantine for 14 days
**starting on the last day of
exposure**
AND
Seek COVID-19 testing 7-10 days
after exposure
AND
Notify the school that the student is a
close contact with someone
diagnosed with COVID-19.
Siblings may remain in school.

Has your quarantined child been tested for COVID-19 (7-10 days after exposure)?

YES - POSITIVE TEST

YES - NEGATIVE TEST

NO

Child must continue to quarantine for 14
days starting on the last day of exposure
AND
Parents must notify school
and other immediate contacts
AND
Siblings must quarantine at home for 14
days since last exposure to infected child,
following this decision tree (if in the same
household, sibling quarantine starts the day
the symptomatic child meets criteria for
returning to school)

Child must
complete
14-day quarantine
AND
Siblings may
remain in school

Child must continue
to quarantine and
monitor for
symptoms through
14 days after
exposure
AND
Siblings may remain
in school

Exposure or Close Contact =
any individual who was within 6 feet
of an infected person for at least 15
minutes starting from 2 days before
illness onset (or, for asymptomatic
patients, 2 days prior to positive
specimen collection) until the time
the patient is isolated.

**Symptoms include any
ONE or more of the following:**

- Fever >100.4
- Loss of taste and/or smell

**OR TWO or more of the following
with new or worsening onset:**

- Fatigue
- Headache
- Muscle/body aches
- Chills
- Cough
- Shortness of breath
- Sore throat
- Congestion/runny nose
- Nausea
- Vomiting
- Diarrhea
- Abdominal pain
